THE CLEAN ENERGY YOU COUNT ON

Our Flexible Acquisition Models Match Your Business Needs

PureCell System Cost of Energy vs. Utility

Traditional Utility

Electric rate: 13.0 c/kWh
20-year cost: \$15.5 M

- High cost
- Budget uncertainty & risk

Doosan Fuel Cell

Fuel cell rate: 11.4 c/kWh
20-year cost: \$10.6 M

- Lower cost
- Better control

Notes and assumptions:

- CA example
- 5% escalation on T&D and commodity electricity. Net amortized equipment includes federal and state incentives (CA SGIP) and is based on a finance rate of 8% over 20 years
- Service is a 20-year comprehensive plan with 3% escalation per year
- Net gas includes fuel cell gas minus the heating gas savings due to heat recovery (50% heat utilization)
- \$7 natural gas price with 3% escalation

Financial Solutions
